SERVICES OVERVIEW

Merit Review

A preliminary review of the medical records to evaluate clinical merit and identify potential areas of concern early in the case.

Medical Chronology

A clear, organized timeline of the medical events built directly from the records for quick reference throughout litigation.

Comprehensive Case Analysis

A detailed review of the medical record with clinical interpretation, focused on what happened, what may have been missed, and where care may have deviated from the standard.

Opposing Expert Analysis

A critical review of opposing expert opinions to identify inconsistencies, unsupported conclusions, and clinical weaknesses relevant to case strategy.

Record Organization and Indexing

Medical records organized, indexed, and paginated for efficient review and easy navigation.

Expert Identification and Sourcing

Identification of qualified medical experts based on specialty, experience, and the specific clinical issues involved in the case.

Medical Research Support

Review and synthesis of relevant medical literature, clinical guidelines, and standards of care to support case development and litigation strategy.
